

# **Harry Robertson**

## **Personal Points**

- I have done well academically, but I prefer real world experience, and a more “hands-on” approach, which is why I chose to do BTEC Business at college and it allowed me to prove to myself just how much I prefer it.
- I really want to have a career that deals with working with businesses and sales/marketing since I love the idea of being able to show someone the true value of something, as well as providing it, and is my main motivation for getting involved into this line of work.
- My main aspiration and life goal is to create a business and career around programming, cybersecurity, and marketing – especially digital marketing, since these are what my main passions are and what I think will be hugely beneficial in my career and life as a whole.
- Programming for me is one key way I am able to do provide value and it's such an amazing feeling, which I want to be able to enhance through sales and marketing skills that I can learn through actively working in the industry.
- I am looking at starting my own business soon that is to do with programming and providing services such as website development and cyber security because of the vast opportunities available in the digital space.

## **Education**

### Ormiston Park Academy – GCSE:

- Maths – Grade 6
- English – Grade 5
- Sciences – Grade 5 for Biology, Chemistry, Physics
- BTEC I.T – D2 (Grade 8)
- Geography – Grade 5

### USP Palmers – College:

- Studied BTEC Business
- DDD (AAA, 144 UCAS Points)

## **Experience**

- I have not had the opportunity to get real job experience, because of every employer requiring me

to have experience of previous jobs, making it an unrealistic requirement, so please think twice about not hiring me because of my lack of experience, I would appreciate it more than you will know and you will be allowing me to finally get some invaluable experience under my belt.

## **Skills**

- Working in a team
- Can work fine on my own
- Self-discipline
- Time Management
- Persuasive
- Clear communication
- Strong focus at current task
- Able to multitask when necessary
- Problem solving
- Entrepreneurial
- Programming skills
- Can pick up and learn new skills quite easily.
- I would definitely say I enjoy breaking down problems and working out how to solve them.

## **Passions**

- Programming
- Gym
- Chess
- Cars
- Racing, rally, F1, touring cars
- Video games
- Football
- Computers
- Maths
- Solving problems
- Building practical things that provide value (such as programming)
- Having a successful career and life through following my passions.
